- - - - - - - -Advertisement- - - - - - -

EMC Metamorphic ceramic capacitors consist of alternate layers of high pe ttivity ceramic and noble-metal electrodes fired together to form a rigid, high integrity structure. Unique processing techniques permit the volume production of extremely thin sections of ceramic. These thin sections together with the external parallel connection of the individual sections increases the volumetric efficiency of these devices by a factor of approximately 100 compared to conventional "single-sheet" ceramic structures.

Electro Optics Associates manufactures Helium-Neon gas lasers for industrial and laboratory application. Principal features are compact and modular design, ruggedness and reliability. Several units are available hermetically sealed for operation under adverse environmental conditions. EOA also manufactures a line of instruments such as optical detectors, tunable filters, calibrated sources as well as laser systems for precision alignment in tooling and construction and for interferometry and metrology.

E.S.L.'s Fired-on silver, platinum, gold etc., glass bonded coatings are widely used for microelectronics circuitry, resistors, terminations capacitors, electrodes and metallized ceramics. They also make dielectric, magnetic, resistive and protective coatings. Conductive potting compounds, adhesives and other resin-based materials are standard. Multilayer and crossover dielectric coatings. Custom formulations.

Write for complete technical and price information on EDL's product line, which includes: Low-medium-hi power single and dual output power supplies. Also precision power supplies with reference source stabilities of up to ≠ 5PPM/oC, ≠15PPM/year. Most of the standard power supplies available in OEM models (less case); Model 1000 FM Encoder/Decoder: Externally converts any audio tape recorder into a precision FM recorder. Ideal for low cost analog data recording from DC to 1 K Hz. The unit is designed in modular form allowing later expansion into a complete multi channel tape system. Because of its high stability this unit also can be used as a Voltage to Frequency and Frequency to Voltage Converter; Digital Panel Meters and Lab Type DVM's, 17 panel meter models to choose from.
These meters also have AC voltage measurement capabilities in the frequency range of 20 Hz to 15 M Hz; Low cost Frequency Synthesizers: Delivers 1 V into 50 Ohms, built in attenuator, frequencies from DC to 20 M Hz sine wave with up to 0.1 Hz resolution. OEM's are invited to take advantage of excellent quantity discounts on the entire product line.

Elmag Corporation maunfactures to customer specifications Electromagnetic Interference Filters, High Voltage and Special Capacitors. The RFI Filters achieve the optimum in the suppression of noise from all spurious energies and can be housed in virtually any package. The High Voltage and Special Capacitors are custom fabricated to meet unique specifications for High Voltage, Multiple Sections, Close Tolerances, High Capacity and High Insulation Resistance. In addition, we can assemble any multiple components network to your requirements. We welcome an opportunity to serve you.

ECL's chip carriers are approved by the E.I.A. & Mil. They are inert in material and are completely free from electrostatic charge,. ECL's chip TRAYPACK is widely used for optical Insp., test, and shipping. Achieve accountability of chips after slicing. Reduce your rejects from contaminates and excessive handling. TRAYPAK's are coated with either Teflon, silicon or electroplate. Are capable of withstanding high bonding temperatures for Molytab processes.

Ewald Instruments Miniature Welding Equipment.

Welding Heads with minimum inertia for pressures of 1/4 ounce to 30 lbs. Hand welding tools and tweezers.

Stored Energy and precision AC Timer power supplies.

Inexpensive AC Timer power supplies.

Dice Bonders for Semiconductor production.

Flash Stripper for shielded and co-ax wire.

Submit samples for free processing and ask for data sheets.

VARIABLE AIR CAPACITORS AND TUNERS are custom designed and fabricated by the Automatic Manufacturing Division of General Instrument Corporation at the Newark, N.J. facility. Each item is processed to meet the specifications through the design stage, model shop construction, environmental and laboratory test stages for customer acceptance and placed into production at this facility. Our primary emphasis is on military components for man-pack, vehicular and airborne communications equipment tuning devices, as well as tuning devices for high quality commercial frequency determing equipment.

Our facility is geared to the supply of custom designed devices to meet your specific needs.

- - - - - - - -Advertisement- - - - - - -

Locate your VHF repeater, microwave relay, telemetering system, remote control devices, TV translators, etc where they should be for most efficient functioning or propogation; independent of power lines or batteries. GI TELAN thermoelectric generators are most economical at power levels of 2 to 300 watts average. Write for TELAN brochure and TELAN Application Handbook (TEMAR brochure for buoy power sources).

G/M COMPONENTS have proven to be superior in function and reliability of operation in thousands of military, space and commercial applications, including aircraft automatic flight control, guidance, weapon systems, fire control, missile and space vehicle flight and stabilization control, pressure-volume-temperature control of gases and liquids.

They conform to MIL-T-27 and MIL-E-5400 specifications, and provide a ready solution to problems involving solid state - integrated or micro circuit - analog computer design. Call or write for Bulletins covering: Magnetic Modulators, Analog Voltage Multipliers DC/AC and DC/DC, Division Modules, AC Line Regulators, Demodulators.

BOBBIN CORES by AUTOMATION: Square-loop magnetic cores of nickel tape, wound on supporting bobbins. Automated for precise uniformity, reproducibility and wider magnetic characteristics. Factory engineering and quick delivery for prototype or production. Low cost services, custom test, "matched sets" enhance economics for ferrite plane drivers, magnetic memories, counters, registers, modulators, mag-amps, inverters, pulse transformers, other saturating-mode devices. Economic replacement for small boxed Tapewound cores. Comprehensive design & technical data distributed free by international representatives on phone request.

Instrument Resistor Company's new line of REED RELAYS are both unique and inexpensive. InResCo's "M" Series have completely sealed windings and Reed Switches yet are priced below most "open" style Reed Relays. Our APC units are ideally suited for Printed Circuit applications. Switch configurations available are form "A" and "C" and combinations. InResCo can still supply your PRECISION WIRE WOUND resistor requirements as we have since 1939.

Intronics manufactures a wide range of electronic "black boxes" including analog multipliers, sample - holds, butter amplifiers, analog dividers, operational amplifiers and operational amplifier power supplies. Many of the "black boxes" are available to meet MIL standards. The units are generally encapsulated and suitable for PC mounting.

Isotemp Research, Inc. is dedicated to precise temperature control of crystals and components using all state-of-the-art temperature sensing elements. Our specialty is low cost solid state proportional control, designed and applied to provide thermal cavities featuring fast warmup, low power drain and ultra stable temperatures. Our accent is on custom ovens--prototypes to specification delivered in 4 weeks, quotations in 48 hours. Ovens are our only business.

KAPPA Super n delay lines are based upon the most advanced, most efficient design in the industry. They provide greater delay-bandwidth (delay/risetime) using fewer components. KAPPA is the world's largest supplier of broadcast quality delay lines.

KAPPA LC filters and networks are designed using advanced computer programs for synthesis and performance analysis. KAPPA specializes in production repeatability of delay corrected, passive LC filters.

Coil Tester--Shorted Turn Indicator--used since 1946 by repeat and new customers. New circuit-board construction. Standard probes for unmounted coils (no iron core or brass sleeve) range in six sizes from 5/32x7/32x3-inch (detects one shorted turn of #44 copper wire in 2-inch dia. loop or #20 wire in 5-ft. dia. loop) down to 0.045x0.050x5/8-inch requiring 3 or more turns #44 to indicate a short. Non-shocking, goof-proof. Requires 5-minute warmup, 10-minute housewife training, your sample shorted turns for "calibration", and your "wire-around-probe and through donut" for toroids at reduced sensitivity. Built for squashing by Mack truck, except small (soft-iron) probes are fragile. Price $250. Shipping wt. 10 lbs.

We manufacture Miniature, Sub-Miniature and Ultra-Miniature Transformers, for transistor circuitry-16 different physical sizes. Designed and manufactured to your specifications or actual requirements. Used in large quantities in military and in industrial and commercial applications. They are available in open-frame constructions with or without brackets for printed circuit use, or hermetically sealed in Mu-Metal Cans. Flexible or hard wire leads. High reliability and on time delivery guaranteed. Phone or write for complete information about your needs.

- - - - - - - -Advertisement- - - - - - - -
Specialists in microwave wageguide components and subsystems assemblies. Unusual custom waveguide devices fabricated to customer drawings or completely designed to customer specifications. Employing cost-saving production techniques, MCS produces in reasonable time, with no do-overs. In addition to custom capabilities a complete catalog line of microwave test equipment from 1.7 to 90 GC is available. This includes ferrite devices, slotted lines, couplers, standard gain horns, attenuators, flanges and related components.

Manufacturer of The Carson Tape Splicer, a precision machined splicing block available for all widths to tape, and of Visi-Mag, a solution for application to magnetic tapes to make visible the signals recorded on the tape.
It is especially useful in troubleshooting digital magnetic tape systems, in video tape editing, in track alignment in head alignment, etc.
Several types are available, Write for further information.

Matrix Science Corp. has for immediate delivery Sub-minature Rack & Panel Connectors per Mil-C-24308. These include crimp & solder, steel & non-magnetic shells with optional float mounts. This new MS connector adds another dimension to the "Matrix Wire Termination System".
Other components in this system are the Matrix Module Terminal Block, Module Feed-Thru and Programming Blocks. When weight and space are limited the Matric Mini-Mate High Density may provide the answer, as it is the lightest and shortest environmental crimp connector on the market. For your umbilical and special requirements, we have 8 years design and production experience on separation devices used on Tactical ICBM Systems.

The Mi-Kro Connector Division for subminiature and ultraminiature coaxial connectors. Sub-miniature series SMB & SMC per MIL-C-22557, ultra-miniature series BUM for ultra-tight space applications. Cable connectors, receptacles, P.C. board connectors, adapters, straight & right angle body styles. Stripline connectors in all series N, TNC, SMA, SMB & SMC. Standard catalog items & custom designed. Flexible & semi-rigid in Mi-Kro grip pressure clamping & crimp cable hardware. Most catalog items in stock for immediate delivery. Experienced engineering & design department for fast response to your connector problem inquiries. Ask about our new BUM coax connector and our SOB P.C. board contacts.

-Advertisement-

NCI manufactures a complete line of solid electrolyte and wet electrolyte tantalum capacitors in plastic molded and metal enclosed cases. Solid tantalum capacitors to MIL-C-39003 and wet tantalum capacitors to MIL-C-3965 and MIL-C-39006 are available from the shelf as well as from a massive electronic distributor organization. Precision molded solid tantalum capacitors in radial and axial lead configurations are manufactured on high speed equipment for the computer, industrial, and military consumer.

NRC's tone telegraph and data transmission equipment represents more than 27,000 duplex channel ends of digital Frequency Shift equipment supplied to military and industrial users throughout the world. Quality, delivery, and flexibility have been the keys to NRC's success in satisfying its customer's needs since 1946. NRC offers its experience as one of the originators in its field towards satisfying customer's requirement.

Parker Instrument's unique etched circuit coil produces a light weight, externally rugged meter movement. Use in panel, control, edge-wise, and aerospace applications where low cost must be accompanied by reliability. Available in a wide choice of styles and ranges to fit any application. Broad Engineering background to assist in design and manufacture of special purpose instrumentation.

Permavolt Transformers, Inc. manufactures custom designed magnetic components for the computer, business machine and quality electronic industries.

Our Specialty Includes:
Constant Voltage Transformers
Constant Voltage Power Supplies
Quality Standard Transformers
Reactors and other magnetic devices
Laser Power Supplies
Xenon Power Supplies
Thermoelectric Power Supplies

Please contact the plant direct for the sales office nearest you.

Ultra low noise (1DB typical) transistor amplifiers for use with infrared detectors and electrical transducers; voltage mode, current mode and automatic bias control. Standard models are available to match all infrared detectors and transducers produced in the U.S. and Europe. Multi-Element amplifier arrays are available in all operating modes with hybrid modules containing up to 100 signal channels. Standard secondary function amplifiers such as: logarythmic, AGC, video, RF, etc., are also available from stock.

--------Advertisement--------

Single and multi-channel oscillographs and systems. General purpose recorders display a continuous presentation of voltage or current measurements in permanent form; a new concept in instrument design allows continuous recording of either current or voltage: AC peak-AC RMS-DC. Solid-state electronics, miniature-modular constructed, combine compactness with high performance and high reliability. Photron designs and manufactures recording equipment to customer specifications.

--------Advertisement--------

Specializing in microelectronic inductors and transformers, we offer fixed and tunable devices ranging in sizes smaller than transistor dice to as large as 1/3 To-5 can volume. Extended tuning range units give 10:1 tuning range. Our devices are considered the most stable in the industry irregardless of size. Present applications include sattelites, military i-f amplifiers, minature transmitters.

RFA's line of ultra-miniature broadband doubly balanced mixers and IF hybrids cover the frequency range of 0.2 to 1500 MHz. These miniature models housed in a TO-33 case are the smallest known and their low profile makes them completely compatible transistors and microcircuits commonly used in high density packaging. These mixers feature greater than a thousand to one bandwidth, extremely low conversion efficiency, high isolation, and low spurious products. Complementing the minature line is a line of high performance standard size mixers, hybrids and quadrature hybrids.

"THE DATA COMMUNICATIONS PEOPLE"
Rixon manufactures a wide variety of reliable, economical, and efficient data sets for both private line and dial facilities operating at speeds up to 9600 bps, many "Bell" compatible. Rixon time and frequency division multiplexers significantly reduce the cost of data communications. Also synchronizers and data entry devices.

S.O.S. manufactures "CHEMTRON" (trademark) reed relays which offer proven reliability, smaller size, and maximum versatility. Over 80 stocked items mean a better selection and faster delivery. The smallest "CHEMTRON" reed relay series occupies less P.C. space than a dual in-line. I.C. package, can be driven by an I.C., and has SPST-NO contacts rated at 4VA. Write or call S.O.S. for a brochure that describes all the "CHEMTRON" reed relays.

SCI specializes in static inverters and completely uninterruptible power systems ranging from 1/2 to over 100 KVA single and three phase, for providing transient-free, completely no-break power to critical instrumentation and computer loads. Long, reliable experience as "state-of-the-art" leader in wide range of highly selective industries concentrated in utilities, oils, chemicals, pipelines, process industries.

Stow Laboratories' PITRAN is a pressure-sensitive transistor (size: TO-46 can) capable of producing a full 2 volt linear output for inputs as low as 7" H20 differential pressure or 1/2 gram point force, without amplification (Model PT-2/3). Small size, high output and fast response account for its wide acceptance in industry and the bio-medical field. Typical applications include: accelerometers, blood pressure and flow sensors, high-speed weighing equipment, microphones (high intensity) and fluidic monitors. Quantity prices now available make the PITRAN a candiadate for many production applications. Models with linear ranges of up to 40 psi are currently on hand; higher ranges will become available periodically.

Manufacturer of the Micrajust Model 20, a dependable, rigidly built, attractively finished, inexpensive, manually operated screening jig. It features lightning fast setup with high precision. Most useful for screening resists for etching and plating electronic printed circuits, for screening panels and resists for panel etching and for general screening of terminal boards, parts and components. Provides means for turning out work of the highest precision at a faster rate, using present personnel and facilities. An experienced screen operator will require no retraining or additional instruction to operate Micrajust.

Tele-Signal designs, manufactures and markets a proprietary line of all solid state, state of the art, modular, custom engineered and standard production, Digital and Analog Voice Frequency Telecommunications and Data Systems and equipment modules for long distance telegraph, telephone and data transmission over wire lines, radio and satellite relay media. Its Data Systems Division provides a total system management for major communications program. Tele-Signal serves World Wide markets, either through company owned and staffed offices or engineering sales representatives serving all branches of the Military, Commercial Common Carriers and Public Utilities. Basic equipment and systems, widely used in commercial and defense communications systems, which meet CCIR, CCITT and DCA performance specifications include Voice frequency Telegraph Carrier (VFTC) and Voice Channel Carrier (VCC) multiplex systems and equipment, Signal Conditioning including Start/Stop, Synchronous and Alternate Mode Regenerators, Serial-to-Parrallel Converters, Speed Converters, Error Protection Systems, Timing Recovery Systems, Frequency Corrected Clocks, Analog to Digital Converters, Solid State Relays, Digital Interface Equipment, Voice Line Conditioning, Telephone Termination and Signaling Equipment, Voice Diversity Combiners, Speech Privacy Equipment, Transmission Test and Measuring Equipment and Systems, Radiation-Free Signal Distribution/Patching Systems and Special Low/High Level Interface Equipment, Remote Supervisory Control and Telemetering Systems, Specialized Telephone Systems and Order Wire Facilities.

Tensitron makes a complete line of instruments for the measurement, recording and automatic control of tension. Check wire tensions during coil winding, cable tensions during insulating; measure the tension of foils and insulators while winding electric condensers. A complete line of new force transducers from the world's most sensitive low force load cell using bonded strain gages to heavy duty cells. Engineering cooperation cheerfully given.

TTI's SYNCLAMPS are the ONLY quick-releasing, self-locking and INSTANT NULLING SYNCHROCLAMPS! Their INTEGRAL STOPS permit component mounting and nulling (techniques that can save 79% OR MORE of the mounting and nulling time!). SYNCLAMPS meet the MAXIMUM MIL SHOCK AND VIBRATION: 2000 ft-lbs/2000 cps! They also have the LOWEST INSTALLED COST of any type of clamp! A size and style for ANY size component and ANY application!!

Look in the Green Section for Products and their Manufacturers

Tell them you found them in eem

PRODUCT DIRECTORY

use it to locate information quickly

The *eem* Product Index and Directory pinpoints any electronic product and the manufacturers making it. The index refers you to the manufacturer's catalog pages in *eem*. If a manufacturer does not have catalog pages, the Product Index refers you to the Manufacturers' Directory (Yellow Section) where you will find the manufacturer's name, address, phone number, key personnel and local Sales Offices.

VANGUARD manufactures an extensive line of general purpose relays and time delay modules covering a broad spectrum of industrial applications. Relay types from 1 to 4 poles and 2 to 20 amps. Models include open, plug-in, enclosed, printed circuit use, antenna, sensitive and contactor. Time delay relays are plug-in, enclosed units with solid state timing circuit and relay output, with some models available from stock. All VANGUARD products are quality engineered and produced, competitively priced with dependable deliveries. Full literature available upon request.

Vari-L's line of solid-state frequency control devices has been giving the utmost in reliability to various precision measuring and control instruments for 15 years. The new Z-Match series of wideband transformers, doubly balanced mixers, hybrids, power dividers and doublers is rapidly achieving the same wide acceptance. Small size and flexible approach to design challenges in RF, VHF, and UHF impedance matching devices may be the answer for your own difficult project.

ARE YOU WORKING IN THE DARK? Varo can help you see the light. Our Electron Devices Division has a complete line of Image Intensifier and Infra-red Converter Tubes for every low light level application. Whether your requirement is for a simple Image Converter, a straight through Image Intensifier, or the more complex variable magnification Image Intensifiers, the Electron Devices Division can fill your needs.

If our present production does not meet your needs, our Engineering Group can develop a tube to your specific requirements.

Series A 1000 UNILEX Electromagnetic Actuator optimizes the magnetic circuit and mechanical coupling to produce millisecond time range linear motion in either direction. Force 8 oz., stroke 1/8". Pulsed voltages for fast operation are approximately 10 X rated continuous DC voltages. Continuous power consumption 3 watts: Size less than 1" cube.

- - - - - - - -Advertisement- - - - - - - -
TEMP-PLATE temperature recording decals are widely used in electronics, aerospace and related industries for measurement of temperatures in difficult to instrument areas. Sizes are as small as 3/16" and prices start at $1.10 each. These parts are self-adhesive, encapsulated for protection, and are accurate to ± 1%. Pastel indicators turn black upon exposure to indicated temperature and are irreversible.

WAVETEK--Complete line of rugged, economical, General Purpose Test Equipment for bench or rack. VCG Function Generator line from .1 μHz to 5 MHz and 1000:1 frequency ratio. Voltage and Frequency Meters with differential potentiometric null balance. General Purpose Sweep Generators from .5 to 300 MHz. IF, VHF, UHF Sweep Generators for domestic and foreign TV channels. IF distribution amplifiers for production stations. Dual-channel Pulse Samplers for accurate high-frequency waveform display. Phase Meter line from 5 Hz to 1 MHz and 5000:1 amplitude ratio. Many units available with manual and/or digitally programmable modes.

Equipment Division makes precision miniature welding, soldering, and bonding equipment and accessories for module, thin film, integrated circuit, and printed circuit board use. Plastics Division supplies electronics industry with stock encapsulation shells, I/C carriers, and does custom molding of very small insert molded thermoset and thermoplastic parts. Components Division manufacturers the Weecoil line of miniature variable inductors, Mil Grad I.F. Transformers, Microminiature R.F. Chokes subminiature I.F. Transformers, and L/C filters.

Thermal Wire Strippers assure freedom from nicked and cut wire strands. Six models available for both prototype and production line operation. Strips Teflon as well as lower-melting plastic insulation such as vinyl, polyethylene, nylon, dacron, rayon, etc. Used on finest stranded wire as well as large coaxial cable without any adjustment. Also available are automatic measuring wire and tubing cutters as well as coaxial cable strippers. Immediate delivery. Ask for catalog.

N. Wood Counter Laboratory, Inc. is a manufacturer and designer of gasfilled, metal wall proportional and GM radiation detector tubes. Excellent characteristics are due to purification of gases and filling procedures, techniques developed over 20 years during which N. Wood has been a supplier to major university and government research laboratories. Standard counters from 1/4" to 46" active are adapted in design to widely diverse purposes.

We design counter tubes as components for portable instruments. Call collect to inquire.

DIRECTORY OF SALES REPRESENTATIVES

consisting of...

ALPHABETICAL SECTION

An alphabetical listing of 2,000 independent sales representatives selling the types of products listed in **eem** — with their branch offices. Includes address, telephone and TWX numbers for main offices.

GEOGRAPHICAL SECTION — Page 3224

Main office listings arranged alphabetically within each state and city, with phone and TWX: numbers. Listings also include:

- Branch office addresses, phone and TWX numbers. Branch offices are also listed geographically with a cross-reference to the main office listing for complete information.
- Manufacturers represented.
- Types of accounts served.
- Facilities and services.
- Number of salesmen. (Parentheses indicate number of salesmen who are engineers.)

This is the most complete list available of independent sales representatives selling electronic equipment, components and materials.

DIRECTORY OF SALES REPRESENTATIVES

GEOGRAPHICAL SECTION (For alphabetical listing see pages 3213 - 3223)

Main office listings arranged alphabetically within each state and city, with phone and TWX numbers. Listings also include:

- Branch office addresses, phone and TWX numbers. Branch offices are also listed geographically with a cross-reference to the main office listing for complete information.
- Manufacturers represented.
- Types of accounts served.
- Facilities and services.
- Number of salesmen. (Parentheses indicate number of salesmen who are engineers.)

This is the most complete list available of independent sales representatives selling electronic equipment, components and materials.

KEY REPRESENTATION

KEY SPECIFYING INFLUENCE
in the electronics OEM

PRODUCT-LINE SPECIALISTS in
- R-F & Microwave Components, Assemblies
- Sensors, Instrumentation, Process Control
- Electronics Production Equipment & Materials

FIELD SALES OFFICES serving:
- Los Angeles / San Diego / Nevada
- San Francisco / Peninsula Area
- Pacific Northwest / Alaska
- Denver / Boulder / Salt Lake City
- Phoenix / Albuquerque / El Paso
- Dallas / Houston / New Orleans

PROMOTIONAL ACTIVITIES
- Trade-Show participation
- Mailing List
- Distinctive "Mr. KEY" Symbol
- Frequent literature mailings
- Promotional Pieces: data charts, etc
- Catalog Binders, Data Sheets
- News Letter, "Key Notes"

FACILITIES AND SERVICES (Los Angeles)
- Warehousing Space (600 sq. ft)
- 24-hour telephone; FAX
- Literature Production Equipment
- Addressing Equipment

KEY REPRESENTATION (213) 549-1770

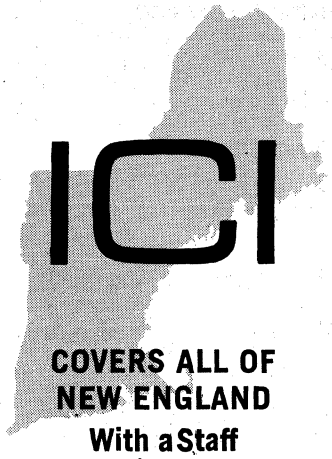
"OUR 16TH YEAR"



COVERS ALL OF NEW ENGLAND

With a Staff of Technically Competent Sales Engineers Who:

1. Help customer's with their applications
2. Communicate complete data of actual customer requirements
3. Sell "specials" as well as "standards"
4. Open new accounts
5. Develop existing accounts
6. Sell creatively and constructively . . . in addition to
7. Taking orders and accepting commission checks

The record of our own growth and the marked increase in business of principals who had been represented in New England before coming to us PROVES WE'RE DOING SOMETHING RIGHT . . . like working hard and intelligently.

Some of our principals are established blue chips; others are relatively new: distinguished by outstanding engineering and quality of product. We look forward to new customer and principal relationships where excellence, initiative, and integrity are key parameters.

REPutation

In this business a worthwhile reputation is made of many things — like wide and long experience, specialists who know your need, dependable products, unusually good service . . . but mostly it is built (and earned) by a company conscience.

GAWLER-KNOOP has a company conscience and the assets that go with it, in depth. *Test it,* and see all the value that doesn't appear on the bill.

we sell

End Use & Test Equipment
from simple voltmeter probes to total systems — including a complete array of test instruments, recorders, counters standards — for all requirements.

Sophisticated OEM Components
including tubes, amplifiers, microwave components, power supplies, attenuators, custom devices.

we service

- Repair and calibration facilities
- Equipment demonstrations
- Experienced field engineers to advise you
- 2 company planes to speed service
- Product information and application data mailed regularly

WRITE US OR CALL for data on specific equipment, application assistance, consultation, prices, delivery, free demonstration. No obligation at any time.

GK gawler-knoop co.

GK serves New York, Long Island, New Jersey, Pennsylvania, Maryland, Delaware, Virginia, West Virginia and the District of Columbia.

QED

IF YOUR MARKETS ARE SOPHISTICATED, YOU NEED SOPHISTICATED REPRESENTATION

THIS IS WHERE IT IS.

Mt. Vernon, N.Y.—500 Nuber Avenue (914) 664-0080
Camden, N.J.—2916 Federal Street (215) 925-8711
Silver Spring, Md.—880 Bonifant St. (301) 588-8134

AND WHO IT IS.

Twenty-one people, experienced, competent, trained people. Fifteen senior engineers with extensive design as well as sales experience, thorough marketing ability, top flight applications engineering capability.

Sales last year? In the multi-millions. Principals: *Beckman Instruments, Inc., Burr-Brown Research Corp., Chronetics, Inc., Data Technology Corp., Dynamics Research Corp., Equipto Electronics Corp., Isofilm International, Millivac Instruments, Inc., Power Designs, Inc., Printed Motors, Inc., Signetics Corp., Siliconix, Inc., Weston Instruments, Inc.* Top-drawer, people and products. Communications: concise, thorough, meaningful, frequent. Promotion: QED Quarterly, 7000 plus circulation; regular mailings; participatory and independent advertising.

Representation: an extension of your best sales engineer.

Energy: fantastic.

TOMORROW'S SALES TODAY—*AND* TOMORROW.

QED builds. Markets—where customers, *your* customers, think QED first—because they know QED will help whenever, wherever, however it can, and help effectively as it so often has. Sales—because QED understands the products it sells, understands them technically as engineers, and understands applications for them and not only the usual applications. And QED understands the customer's problem, lives with it, helps with its solution.

QED sells *now*—really sells—and prepares tomorrow's sales today.

QED Knows, Serves, Sells the mid-Atlantic region.

QED

Factories: ETC Inc.; American Zettler; Westlake Insulated Wire.
Selling To: ★ I. **Salesmen:** 3 (eng 2)

HONKAMP SALES CO., 11120 W. Ruby Ave., (414) 463-2530.
Factories: Grand Ind. Inc.; Illinois Condenser Sales; Life Inst.; Methode E.ctrn.; Resistors.
Selling To: ★ D,I. **Salesmen:** 2 (eng 1)
Services: Sales

JACOBS, M. F. CO., 4160 N. Oakland Ave., (414) 962-7070.
Factories: Associated Res.; Columbia Elec. Mfg.; H. H. Sticht Co.; Vibroscope, Inc.
Selling To: ★ D,I. **Salesman:** 1 (eng 1)

LOEB, E. R. SALES CO., Box 3643, (414) 964-2155.
Factories: Mercury Elctrn.; Sonic Ind.; Toshiba America, Inc.
Selling To: ★ A,D. **Salesman:** 1
Services: Repair, Warehouse

PETERS, W. J., 10031 W. Lisbon Ave., (414) 463-9660.
Factories: Acme Screw Co.; Allied Decals, Inc.; Barwood Mfg.; Gries Reproducer; Jacobson Mfg.; Noble & Westbrook.
Selling To: ★ I. **Salesmen:** 2

POLACHECK, C. S., 4027 W. Downer Ave., (414) 964-5565.
Selling To: ★ I. **Salesman:** 1

IRC PRODUCT GUIDE

Complete catalog data on all IRC resistors and potentiometers

Pages 2379-2382

PRECISION FILM RESISTORS

Premium and economical T-0 styles, microminiature types, molded and conformally coated deposited carbon and metal film resistors.

IRC BURLINGTON DIVISION OF TRW INC.

Pages 2389, 2390

POWER WIREWOUND RESISTORS

Tubular, flat, adjustable, ferrule, tapped and stacking styles. Variety of mountings and brackets.

IRC BOONE DIVISION OF TRW INC.

Pages 2383-2385

PRECISION WIREWOUND RESISTORS

Military and commercial types in a variety of lead and lug configurations. Also miniature precision wirewounds.

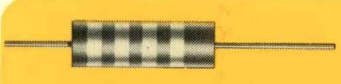
IRC BOONE DIVISION OF TRW INC.

Pages 2391-2393

SPECIAL APPLICATION RESISTORS

Automotive, appliance, high-frequency, and high-voltage types. Strips and concentric discs.

IRC BOONE DIVISION OF TRW INC.



Page 2386

PRECISION AND SEMI-PRECISION METAL GLAZE RESISTORS

Thick-film stability in styles for military, industrial and commercial applications.

IRC BOONE DIVISION OF TRW INC.

Pages 2474-2479

TRIMMING POTENTIOMETERS

Widest selection of rectangular, square, round and cube styles for military, industrial, and low-cost needs. Choice of infinite resolution Metal Glaze or precision wirewound elements.

IRC ST. PETERSBURG DIVISION OF TRW INC.

Page 2387

GENERAL PURPOSE RESISTORS

Complete coverage of all your carbon composition needs, plus molded wirewound types. Packaging for automation.

IRC PHILADELPHIA DIVISION OF TRW INC.

Pages 1172, 2480, 2481

MULTI-TURN POTENTIOMETERS

All sizes from ½-inch through 1½-inch diameters. Three to twenty turns. REVODEX® dials.

IRC ST. PETERSBURG DIVISION OF TRW INC.

Page 2388

HIGH-TEMPERATURE POWER RESISTORS

Fireproof inorganic construction in a variety of sizes, ratings and lead configurations.

IRC BOONE DIVISION OF TRW INC.

ELECTRONICS GROUP **TRW**®
